

K-LOVE Radio (FM 88.5, 98.3, and 92.1 in our area) provides a very useful and needed service in my community. These stations support family values, promote local events, and preserve Christian ideals for their listeners. Americans deserve the privilege to have these stations available as positive alternatives across the airways. If the Low Power FM service is expanded many listeners will be denied the great asset of positive and encouraging radio in their communities. Please do not expand the LPFM service.
